C Em
You don't have to be right, you don't have to be smart
Dm F G
You don't have to be what you are, you don't have to be what you aren't
You are completely loved, you're forever forgiven
My great heart is enlarged by your wondrous existence

C Dm
I'm the last to judge
Em F
I'm the first to love
Dm F
I always was, I always will be
G C
I am who I am

You don't have to make sense, you can tell me what's on your mind
You can never offend one who sees you from every side
And I love who I see and you're not the only one
Take a look around, oh I feel this for everyone

I'm the last to judge . . .

F Em Dm G
In the end all that it comes down to is love in everything

And that's what the world needs, that's what everyone's wanting
It feels impossible but with me nothing
Is impossible, no it's never been easy
but it's simple enough for a child to see

I'm the last to judge . . .
